
QCB+ Series

THE BEER PUMP

The best pump for handling beer and minimizing the most common issues regarding beer production, such as seal wear, leakage, cavitation, and flashing between seal faces.

QCB+ SERIES

THE BEER PUMP

At Q-Pumps we have been designing concrete solutions for each application for more than 20 years, for which we have created the QCB+ Series especially for the beer production.

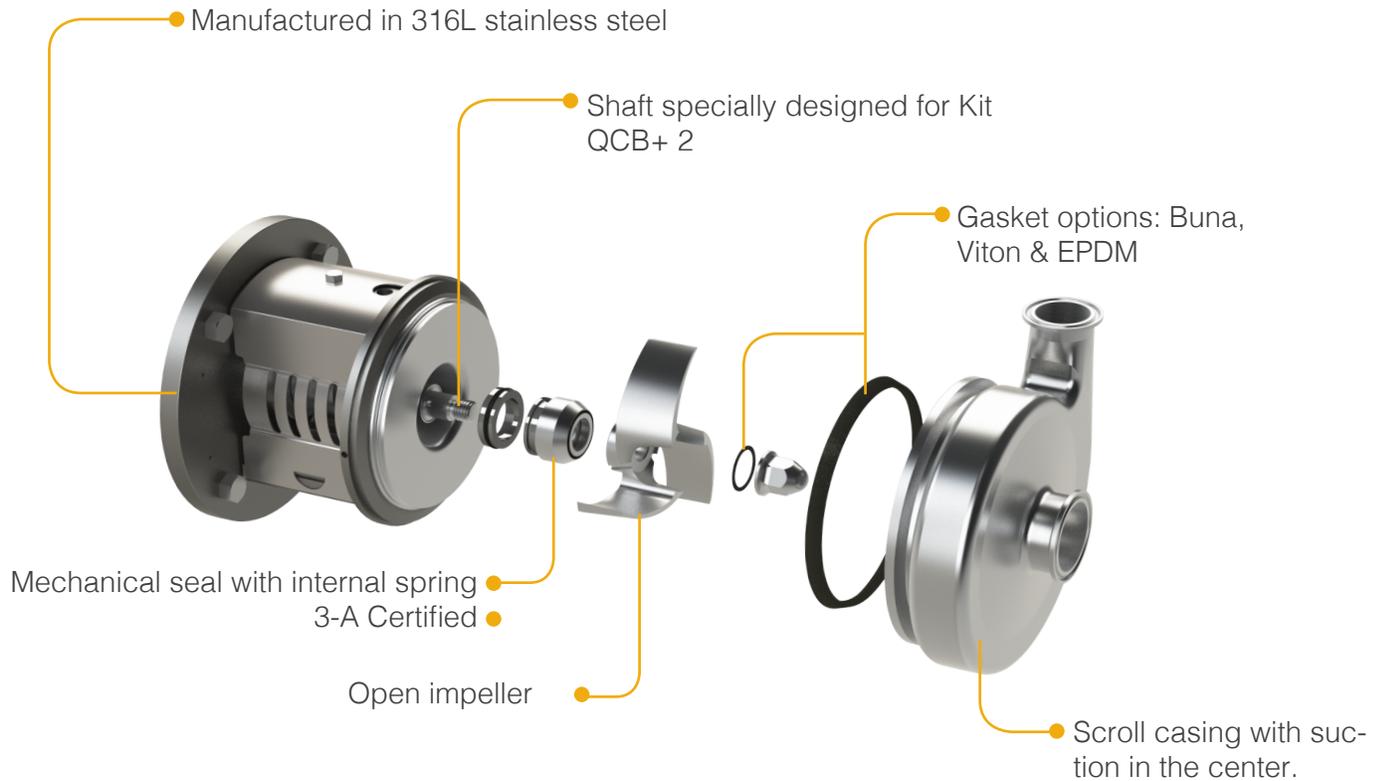

ADVANTAGES

- The internal seal is submerged inside the product to promote cooling, which reduces cavitation and provides a constant flow.
- Can run at low RPM to reduce malt abuse, preventing the release of chemicals that generate undesirable flavors.
- The pressure of the pump generates greater closing force on the faces of the seals, minimizing the agglomeration of the product.
- Reduction of damage generated by water hammer, which extends the life of the seal and avoids the usual drips generated by wear.
- It represents a great saving since the QCB+ Series is hydraulically and dimensionally interchangeable with QC / C series pumps.
- 3A certified

PUMPING EVOLUTION

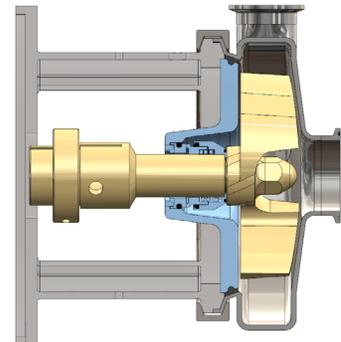

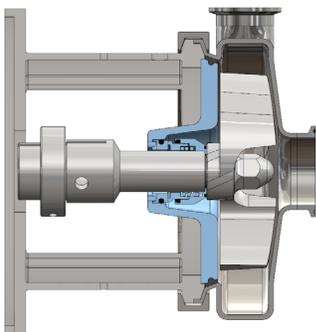

Any QC+ pump can be converted into a QCB+ through two kit options:

QCB+1 Kit

It is possible to convert a QC+ into a QCB+ pump by replacing the seal and the back cover.

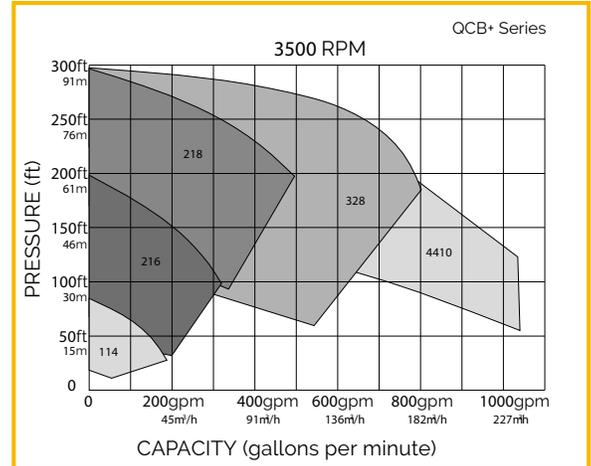

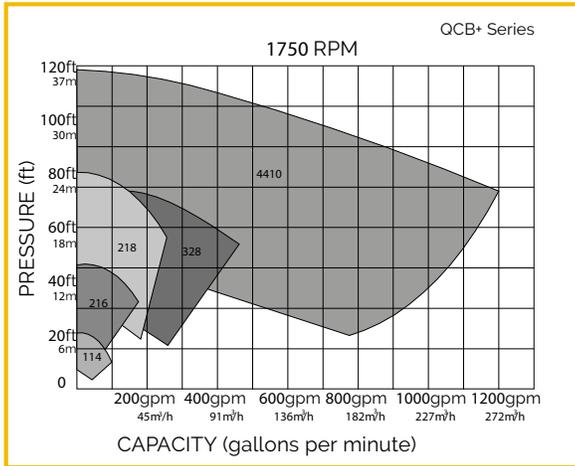

QCB+2 Kit

Universally compatible with any QC/C series pump to be transformed into a QCB+ by replacing the seals, shaft, impeller and back cover.

QCB+ SERIES

THE BEER PUMP

Model	Inlet*	Outlet*	Maximum impeller
QCB+ 114	1.5"	1.5"	4" - 102mm
QCB+ 214	2.0"	1.5"	4" - 102mm
QCB+ 216	2.0"	1.5"	6" - 152mm
QCB+ 316	2.5"	1.5"	6" - 152mm
QCB+ 218	2.0"	1.5"	8" - 203mm
QCB+ 318	3.0"	1.5"	8" - 203mm
QCB+ 328	3.0"	2.0"	8" - 203mm
QCB+ 428	4.0"	2.0"	8" - 203mm
QCB+ 4410	4.0"	4.0"	10" - 254mm
QCB+ 6410	6.0"	4.0"	10" - 254mm

*Clamp, DIN, etc.
